An experienced **Front-end Developer** with **3+ years** of expertise in web development and full-stack solutions. Proficient in **JavaScript, TypeScript, React.js, Next.js, and Node.js**. Skilled in developing responsive user interfaces and optimizing performance for diverse projects. Experienced in building **e-commerce, market-place websites, and enterprise applications**. Strong teamwork and problem-solving abilities, delivering projects on time with a focus on quality and business impact. Demonstrates a solid understanding of cloud hosting, API integration, and scalable application design. Dedicated to delivering innovative and efficient solutions in dynamic, technology-driven environments.

## Experience

### Double Plus Infotech

Jun 2022 - Dec 2022

#### Frontend Developer

- Contributed to the development of a feature-rich E-Commerce website using React.js.
- Assisted in building dynamic product pages, integrating payment gateways, and connecting APIs for real-time data handling.
- Collaborated on implementing responsive layouts and performance enhancements to ensure a smooth user experience across devices.

### Avrut Solutions

Jan 2022 – Mar 2025

#### Frontend Developer

- Developed Draag, a web-based job management dashboard with drag-and-drop functionality to assign tasks, track employee performance, and streamline workflows.
- Built a responsive and secure betting web application using the MERN stack, featuring real-time updates, user authentication, and dynamic odds display.
- Resolved complex bugs, optimized application performance, and delivered scalable web solutions across multiple client projects.

## Projects

### Draag (Sales & Task Management Dashboard)

- Developed Draag, a comprehensive sales and task management dashboard using **React.js, Node.js, Redux Thunk, Redux Toolkit, Context API, Tailwind CSS, and Material UI**. The platform streamlined the full sales pipeline—from lead generation to deal closure—and included robust tools for task assignment and team coordination.
- Implemented advanced features such as expense management, custom reporting, and AI-powered performance tracking, allowing businesses to monitor budgets, generate tailored data-rich reports, and analyze metrics across departments.
- Collaborated closely with the team to resolve critical bugs and implement feature enhancements, improving platform stability and functionality.

### BizzCape (MarketPlace Platform)

- Built a full-featured marketplace website using **Next.js, React.js, Redux Thunk, Context API, Tailwind CSS, Ant Design, Node.js, and MongoDB**.
- Developed user-facing storefronts, seller dashboards, and affiliate panels with tailored functionalities for each role.
- Implemented features for product listings, commission-based affiliate tracking, secure authentication, and real-time updates across user types.
- Designed a responsive and intuitive UI with Ant Design and Tailwind CSS, ensuring a seamless experience across devices.

### E-commerce Store (GemStone Jewellery)

- Worked closely with backend teams to ensure secure payment gateway integration and real-time order updates.
- Built features like user authentication, Profile management, Cart, Wishlist, and Checkout.
- Worked on product filters, search, and payment integration to improve user convenience.

## Education

### Veer Narmad South Gujarat University, Surat

Aug 2019 – April 2022

Bachelor of Computer Application

## Technical Skills

**Languages** JavaScript, HTML, CSS, TypeScript  
**Frameworks** React.js, Next.js, Redux, Node.js, Express.js  
**Tools** GitHub, Postman, VS Code

**Databases** Firebase, MySQL, MongoDB  
**Version Control** Git, Gitlab
